## TEACHER'S PEDAGOGICAL CONTENT KNOWLEDGE AND STUDENT'S UNDERSTANDING OF INTEGER OPERATIONS

Developing and testing a theory for improving teacher and student understanding of integers

July 2010
Summer
Program

341 students

22 teachers

MODIFIED
PD ( 6 hrs of the 2 days)

## Why integer operations?

$\square$ Foundational Mathematic Concept
$\square$ Applications in STEM fields
$\square$ Impacts accuracy of solution to many problems
$\square$ Mathematics Ed community hasn't found an instructional model that works

## Models for Teaching Integer Operations

Annihilation model

Number line

Elevation or
Elevator

Metaphors

Real World
Application

## Pilot Study- May 2008

$\square$ Structured interviews

- Students in grade 7, 9, 11
$\square$ Given an integer operation expression, how would you solve it?

## Overall Percent Accuracy of Integer Arithmetic

| Accuracy | Grade 7 <br> $(n=21)$ | Grade 9 <br> $(n=24)$ | Grade 11 <br> $(n=20)$ | Total <br> $(n=65)$ |
| :--- | :---: | :---: | :---: | :---: |
| $-5+8=3$ | 62 | 100 | 60 | 74 |
| $-3+-6=-9$ | 57 | 79 | 45 | 60 |
| $2-7=-5$ | 19 | 63 | 45 | 42 |
| $-3-5=-8$ | 19 | 25 | 35 | 26 |
| $-4 \times 5=-20$ | 76 | 75 | 75 | 75 |
| Total | 47 | 68 | 55 | 57 |

## Grade 7 Student

 $-5+8=?$
$7^{\text {th }}$ grade student response: "I used this" (points to Pie Man)
"Negative and positive, I went like this" (Student covered the negative and positive signs with two fingers)
"and then you have a negative"

## Theoretical Framework

Pedagogical Content Knowledge (PCK)
$\square$ Mathematics
$\square$ Representations
$\square$ Student's thinking
$\square$ Decision Making
$\square$ Clarifying examples and counter examples

## Argumentation

$\square$ Reasoning
$\square$ Justifying their thinking
$\square$ Making claims and warrants
$\square$ Classroom Norms

| PROFESSIONAL <br> DEVELOPMENT <br> July 2010 (6hrs) <br> - Real world contexts <br> - Number line vector representation <br> - Student misconceptions <br> - Promoting productive classroom discourse | IMPROVED TEACHER PCK July 2010 ( $\mathbf{3} \mathbf{w k s}$ ) <br> - Implement activities with real world connections <br> - Implement number line vector model activities <br> - Facilitate and encourage classroom discourse and argumentation |  |
| :---: | :---: | :---: |

## Theory of Change

## Summer Program

$\square$ Grade 8 Students who had not passed the state assessment in mathematics
$\square$ Requirement to be promoted to grade 9
$\square 14$ days, 9:15-1:45pm
$\square$ Program started in 2008
$\square$ Curriculum focus:
$\square$ Generalizing Patterns using Algebra
$\square$ Positive and Negative Numbers

## Curriculum

$\square$ America's Choice Navigator
$\square$ Generalizing Patterns
$\square$ Positive and Negative Numbers

60 minute lessons and activities

- Misconceptions
- Student discourse

## Subtraction and Multiplication

$$
-4-5=-9
$$

$4 \times(-2)=-8$

- Purpose of negative numbers
- Comprehensive
- Prepares students for higher math and science

## Summer Program 2009

| Topics: | Pretest <br> $(n=206)$ | Posttest <br> $(n=242)$ | Growth <br> $(n=177)$ |
| :--- | :---: | :---: | :---: |
|  <br> Negative <br> Numbers | $43 \%$ | $49 \%$ | $+6 \%$ |
| Patterns | $\mathbf{4 0 \%}$ | $50 \%$ | $+\mathbf{1 0 \%}$ |

## Modified Summer Program with a Focus on Conceptual Understanding and Argumentation

## Argumentation (90\%)

## Addition of TI-73 Calculator NumLine Activities

## Research Question \#1

$\square$ What are the general patterns of teacher PCK related to integer operations?

## Percent of Teachers Who Achieved Ratings

| Questions: | Pre-test Ratings |  |  |
| :---: | :---: | :---: | :---: |
| (Note: 0 points for incorrect or no response, 1 | ( $n=18$ teachers) |  |  |
| point for partially correct response, 2 points for complete correct response) | 0 | 1 | 2 |
| Explain the solution of 5-(-8)? | 50 | 33 | 17 |
| Given $-5 \times(-8)$. Why does the answer have the sign it does? | 72 | 17 | 11 |
| $(-6)+(+7)$ and $6-(+7)$ read incorrectly | 22 | 28 | 50 |
| 4-7=3, what is the misconception and what is a teaching strategy | 6 | 44 | 50 |
| Is 3-5 the same as $3+(-5)$ ? | 61 | 28 | 11 |
| Prior experience with argumentation in class | 33 | 28 | 39 |
| Real world and domain applications | 11 | 72 | 17 |

Research Question \#2
$\square$ To what extent did PD change teacher PCK ?

Teacher Pedagogical Content Knowledge ( $n=18$ )

## Change in Teacher Understanding of Integer Operations

| Question <br> ( $\mathrm{N}=18$ teachers) | Pretest Mean (SD) | Posttest <br> Mean <br> (SD) | Difference (SE) | $t$ | $p$-value |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Q1. 5-(-8) | $\begin{gathered} \hline .67 \\ (.77) \end{gathered}$ | $\begin{aligned} & 1.11 \\ & (.96) \end{aligned}$ | $\begin{gathered} .44 \\ (.32) \end{gathered}$ | 1.41 | . 18 |
| Q2. $-5 \times(-8)$ | $\begin{gathered} .39 \\ (.70) \end{gathered}$ | $\begin{aligned} & \hline 1.00 \\ & (.97) \end{aligned}$ | $\begin{gathered} .61 \\ (.26) \end{gathered}$ | 2.37 | .03* |
| $\begin{gathered} \hline \text { Q3. }(-6)+(+7), \\ 6-(+7) \end{gathered}$ | $\begin{aligned} & \hline 1.28 \\ & (.83) \end{aligned}$ | $\begin{aligned} & 1.83 \\ & (.38) \end{aligned}$ | $\begin{gathered} .56 \\ (.17) \end{gathered}$ | 3.34 | $p<.01$ |
| Q4. $4-7=3$ | $\begin{aligned} & \hline 1.44 \\ & (.62) \end{aligned}$ | $\begin{aligned} & 1.61 \\ & .61) \end{aligned}$ | $\begin{gathered} \hline .17 \\ (.12) \end{gathered}$ | 1.37 | . 19 |
| Q5. 3-5, 3+(-5) | $\begin{gathered} .50 \\ (.71) \end{gathered}$ | $\begin{gathered} .89 \\ (.68) \end{gathered}$ | $\begin{gathered} \hline .39 \\ (.20) \end{gathered}$ | 1.94 | . 07 |
| Q6. Prior use of Argumentation | $\begin{aligned} & \hline 1.06 \\ & (.87) \end{aligned}$ | $\begin{aligned} & 1.22 \\ & (.88) \end{aligned}$ | $\begin{gathered} \hline .17 \\ (.20) \end{gathered}$ | . 83 | . 42 |
| Q7. Applications | $\begin{aligned} & 1.06 \\ & (.54) \end{aligned}$ | $\begin{aligned} & 1.33 \\ & . .59) \end{aligned}$ | $\begin{gathered} \hline .28 \\ (.11) \end{gathered}$ | 2.55 | .02* |

## Research Question \#3

$\square$ Is there a statistically significant difference between Jumpstart 2010 and Jumpstart 2009 in student performance?

## Hierarchical Linear Model (HLM) for 2009 vs. 2010 Comparison

## Level-1 Model

$$
Y_{i j}=\beta_{0}+r_{i j}
$$

Level-2 Model

$$
\beta_{0}=\gamma_{00}+\gamma_{10}(\mathrm{YEAR}) u_{0 j}
$$

$Y_{i j}$ was used to represent each outcome measure (pretest and posttest) and the change in score of students between preand posttest.

## 2009 vs. 2010

| Percent <br> Correct <br> out of 100 | 2010 Mean <br> $(n=177)$ <br> $(S D)$ | 2009 Mean <br> $(n=177)$ <br> $(S D)$ | Difference <br> $(\mathrm{SE})$ | $t$ | $p$-value |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Pre-test | 37 | 43 | -7 | -1.77 | .08 |
|  | $(17)$ | $(19)$ | $(4)$ |  |  |
| Posttest | 51 | 49 | 2 | .41 | .68 |
|  | $(15)$ | $(21)$ | $(4)$ |  |  |
| Improvement | 14 | 06 | 8 | 2.20 | $.03^{*}$ |
|  | $(17)$ | $(19)$ | $(3)$ |  |  |
|  |  |  |  |  |  |
| *Statistically significant at the $p<.05$ level. |  |  |  |  |  |

## Research Question \#4

$\square$ Do differences in teacher PCK explain more of the variance in student performance than years teaching experience?

## HLM Analysis to Model Posttest Fully Conditional Model

Level-1 Model
$Y_{i j}=\beta_{0}+\beta_{1}{ }^{*}$ (Student Pretest) $+r_{i j}$
Level-2 Model
$\beta_{0}=\gamma_{00}+\gamma_{01}{ }^{*}$ (Teacher Experience) + $\gamma_{02}{ }^{*}$ (Teacher PCK Pretest) $+\gamma_{03}{ }^{*}$ (Teacher PCK Posttest) $+u_{0 j}$
$\beta_{1}=\gamma_{10}$
$Y_{i j}$ is the posttest score of student $i$ in class $i$

## Percent of Level-2 (teacher) Variance in Student Knowledge

Controlling for prior student and teacher knowledge as well as teacher experience, teacher's pedagogical content knowledge (PCK) significantly predicted student posttest performance ( $p=.033$ ) ( 1 pt increase in PCK, .22 increase in student performance)

## Implications for Future Directions

> Implications for Equity for All Students

- Focus on conceptual development not activities
- Focus on argumentation

PD for in-service and pre-service teachers
> Measuring PCK
> Supporting teachers in using argumentation in the classroom

## Part 4: Questions \& Discussion
