What I Rolled	What I Shaded

What I Rolled	What I Shaded

Find a Fraction

- Each partner gets one side of the board.
- Using a standard die or deca-die, players roll a number and place it anywhere on their side of the board, with the goal of getting as close to the target number (in the center column) as possible.
- Score is the difference between what the player has rolled and the target number.

Version 1: Player gets 1 point for each fraction that is closer to the target. Winner is the player with the most points.

Version 2: Each player finds the difference between their fraction and the target and adds them together. Winner is the player with the lowest sum.
