

NCTM Indianapolis Conference

All content: <http://bit.ly/nctmindy>

Session 110: Graphing Technologies in the Common Core Classroom

Thursday, October 30, 2014: 01:30 PM - 02:45 PM, Westin, Capitol 1 (Westin)

For the best experience, please bring an internet-active device so we can use GeoGebra, Desmos or your favourite graphing technology OR bring a device with GeoGebra pre-installed (<http://www.geogebra.org>). The Desmos App or GeoGebra App on your mobile device will also work.

You are welcome to attend without a device and just watch and take notes :)

Unfortunately, there is a cost to having internet during the conference, unless you tether your phone or have cell service on your device.

All the materials will be posted to this OneNote <http://bit.ly/nctmindy> for later use in your classroom. If you would like to edit this OneNote (you are welcome to add your own section/page) please email me for access: carmstrong@appleby.on.ca
