

Math Retest Procedure Suggestions

The following are suggestions for practices of implementing a retest procedure.

All of my students who have not demonstrated mastery are required to retest. Those who wish to improve their score may also retest after they have completed the Math Error Analysis Form. Adapted from <http://ditson.pbworks.com/w/file/fetch/85883653/Math%20Test%20Corrections.pdf>

Suggestion

The student requesting a retake on a test must do the following before being allowed the opportunity to retake the test:

REQUIRED

- I have completed my core problems
- I completed and turned in my homework log with 90% or higher completion rate
- I corrected all incorrect problems on original test
- My parent/guardian signed my original test.

MUST DO AT LEAST ONE OF THE FOLLOWING:

- I completed extra practice work (see my attached work).
- I participated in an extra help session with the teacher.
